

LEISURE EQUIPMENT & NARROWBOAT MANUFACTURE

We have many years' experience of working with a wide range of industry sectors and are flexible in meeting their needs and requirements. One of our specialist areas is the manufacture of leisure equipment and narrowboats. We have a growing customer base in the leisure industry, providing sportsground equipment such as site screens, wicket covers and protective fences on cricket pitches, stands for football grounds, and bespoke golf course structures including enclosures, bridges, gates and fences.

We are one of only 20-30 recognised narrowboat builders in the country, using traditional crafts and skills to manufacture these individual boats. We manufacture the complete structure from the initial design, build, fitting windows, engine installation and electrical wiring.

Alken for a complete engineering solution:

- ▶ Precision CNC milling & turning
- ▶ Design & build structural steel buildings
- ▶ Long lathe & large diameter turning capacity
- ▶ In house profile cutting facility
- ▶ Bespoke onsite fabrication & servicing

The manufacture of leisure equipment and narrowboats is a clear indication of our strengths in the engineering industry as a complete solution provider.

We also offer CNC milling and turning, long lathe turning, laser profiling, cutting and fabrication services in-house if required for your design and build project.

Our complete engineering solution gives our customers even greater value, reducing potential supplier and administration costs and project timescales.
